

Document Reference	Sub-Document Reference, if applicable	General Description of Reference Usage
<u>Transmission, Markets & Services Tariff</u>	<u>General Terms & Conditions</u>	General definitions as well as the rights, privileges and obligations of all parties and actions they may or must take under the Tariff.
	<u>Open Access Transmission Tariff</u>	Procedures electric energy suppliers must follow to access the region's transmission system to transport electricity throughout New England.
	<u>Market Rule 1</u>	Information on Market Rule 1, which governs the operation of New England's wholesale electric power markets.
	<u>ISO Self-Funding & Capital Funding Tariffs</u>	The Self-Funding and Capital Funding Tariffs control how ISO-NE collects funds to pay for administrative functions and certain capital acquisitions.
	<u>Attachments</u>	Additional rights and responsibilities of businesses or organizations regarding the rates, terms and conditions for transmission, market and other services provided by ISO-NE.
<u>ISO New England Manuals</u>	<i>(intentionally blank)</i>	Explanation of rules and procedures for the region's wholesale electric power markets and bulk power system, including Market Rule 1, the Open Access Transmission Tariff and the ISO Self-Funding Tariff.
<u>User Guides</u>	<i>(intentionally blank)</i>	Reference guides and task materials assist in submitting transactions within Standard Market Design Applications and inputting data into our Customer & Asset Management System.

Document Reference	Sub-Document Reference, if applicable	General Description of Reference Usage
<u>Billing Details</u>	<u>Bill Job Aids</u>	Detailed description of line items that may appear on your invoice and will assist you in accurately reconciling your bill.
	<u>Settlement Enhancements</u>	Presentations associated with the numerous on-going settlement changes.
	<u>FERC Electric Quarterly Reporting</u>	Detailed information to assist the Market Participant in their FERC Electric Quarterly Reporting (EQR) filings.
<u>Market Analysis & Reports</u>	<u>Weekly Market Performance Reports</u>	Weekly ISO-NE summaries of key statistics, events and trends related to the region’s wholesale electric power markets.
	<u>Monthly Market Performance Reports</u>	Monthly ISO-NE summaries of key statistics, events and trends related to the region’s wholesale electric power markets.
	<u>Quarterly Market Performance Reports</u>	Quarterly reports of key statistics for the region’s wholesale electric power markets.
	<u>Annual Market Performance Reports & Annual Forum</u>	Annual review of the performance, competitiveness and efficiency of New England’s wholesale electricity markets.
	<u>Monthly & Weekly LMP Indices</u>	ISO-NE's price indices are the simple average of the hourly zonal and HUB LMPs. The underlying hourly zonal prices are load weighted based on the individual load nodes, and the hourly HUB price is a simple arithmetic average of the HUB component nodes.
	<u>Wholesale Load Cost</u>	Monthly summary reports of component costs of real-time wholesale electricity by load zone.
	<u>Regional Network Load Cost</u>	Monthly summary of the costs associated with the provision of regional network transmission service (RNS), including charges for the use of transmission facilities, reliability, and certain administrative services outlined in the OATT.
