An access ID and Password is assigned to a company and not to any one user. By default it allows information-only access. **Any password change must be communicated among the users.** Once the access has been set-up initially, you will be contacted with your company logon information.

If you need additional access in a different location or department, an additional access ID for that area can be provided and Passwords need not be shared across locations or departments.

The service must be accessed at least once ever three months to keep the ID active. If the login is not accessed, the ID will be removed from the system and a new ID will have to be requested to resume the service.

Please contact BlackRock Fund Special Services team at (800) 444-3390 with any questions.
